Appendix 7 Competency Self – Assessment Form

Flexi-seal Faecal Management System

Aim: To establish competency in the appropriate selection of patients for whom the Flexi-Seal Faecal Management System would be appropriate and the correct insertion, maintenance and removal procedures working within Trust guidelines and the individuals scope of professional practice.

	Critical Competencies	Met	Not	Comments
	Do you know how to/can you:	IVIO	Met	Commonto
	Patient Selection			
1	Checks for appropriate patient selection criteria			
	 Liquid to semi-liquid stool 			
	Adequate sphincter tone			
	No contraindications			
2	Demonstrates understanding and ability to			
-	implement the Trust policy for:			
	Before proceeding consults with medical			
	staff			
	Appropriate person performing digital			
	rectal examination before insertion of			
	FMS and recording satisfactory outcome			
	before insertion			
	 Explains procedure to patient and obtains 			
	patient consent according to Trust policy			
	 Makes provision for patient privacy and 			
	dignity to be maintained during the			
	procedure.			
	Insertion Competencies			
1	Obtains appropriate equipment (kit, gloves,			
	incontinent pad, lubricant, protective barrier)			
2	Preassembles the system, removes air from the			
	balloon and fills syringe with no more than 45mls			
	of tap water			
3	Positions patient appropriately, ideally left side-			
	lying			
4	Demonstrates proper insertion technique, and			
	positions balloon beyond the external			
	orifice/rectal sphincter and well inside the rectal			
	vault before inflating.			
5	Describes how to tell if the balloon is properly			
	inflated and what to do in the event of improper			
	balloon inflation.			
6	Check for proper positioning of the balloon			
	against the rectal floor by gently pulling on the			
	catheter.			
7	States the position of the black indicator line			
	after insertion and records appropriately in			

patients notes. Demonstrates how to hang the collection bag at the bedside. On completion of the procedure ensures accurate documentation is maintained, by recording date and time of insertion, volume of water in retention cuff, and batch number of Flexi-Seal FMS Demonstrates understanding of disposal of device, bags and other equipment according to Trust policy. Maintenance Competencies Demonstrates how to correctly irrigate the catheter. Appropriately change collection bag as per policy. Demonstrates procedure for stool sampling	
the bedside. 9 On completion of the procedure ensures accurate documentation is maintained, by recording date and time of insertion, volume of water in retention cuff, and batch number of Flexi-Seal FMS 10 Demonstrates understanding of disposal of device, bags and other equipment according to Trust policy. Maintenance Competencies 1 Demonstrates how to correctly irrigate the catheter. 2 Appropriately change collection bag as per policy.

device, bags and other equipment according to Trust policy. Maintenance Competencies Demonstrates how to correctly irrigate the catheter. Appropriately change collection bag as per policy.	
Trust policy. Maintenance Competencies Demonstrates how to correctly irrigate the catheter. Appropriately change collection bag as per policy.	
Maintenance Competencies Demonstrates how to correctly irrigate the catheter. Appropriately change collection bag as per policy.	
1 Demonstrates how to correctly irrigate the catheter. 2 Appropriately change collection bag as per policy.	
catheter. 2 Appropriately change collection bag as per policy.	
2 Appropriately change collection bag as per policy.	
policy.	
according to policy and hospital protocol.	
4 Discuss importance of maintaining accurate fluid	
balance and records	
5 Understands how to maintain patency of device:	
Checks the black indicator mark is in	
correct position	
Correct use of irrigation port	
Maintains position of bag below level of	
bowel	
Removal Competencies	
1 Describes clearly the indications for removal of	
the device	
2 Demonstrates how to deflate the balloon prior to	
removal of the device.	
3 Describes how to dispose of the device	
according to hospital protocol.	
4 Cites the maximum length of use of Flexi-Seal	
FMS as 29 consecutive days	

Notes:			

Competency self assessment statement:

Having answered the above questions, I declare that I am now competent to use the Flexi-Seal Faecal management System appropriately and in accordance with Trust Guidelines . You must have correctly answered MET to all the above to consider yourself competent.

Name: Signature	Date:					
Ward/Department	Band					
Having reviewed the above questions, I require further training to use this device in a competent manner.
